Portfolio : portofolio-asri.netlify.app/

Information Systems student with a strong interest in Data Analytics, and the use of AI for business decisionmaking. Experienced in data collection, data processing, data analysis, data modeling, and data visualization to generate insights that support decision optimization in various business projects. Mastery of Python, basic SQL, Excel, Power BI, and is accustomed to conducting Exploratory Data Analysis (EDA), descriptive analysis, and prediction. Actively participates in data science competitions and business analysis projects. Has strong analytical thinking skills, business understanding, and collaborative work.

Education

Ary Ginanjar University

Sep 2023 - Sep 2027 (Expected)

Information Systems - 7th Semester Student

- Received a full scholarship for four years of undergraduate study.
- Served as Secretary of the Business Department within the Student Executive Board (BEM).
- Actively participated in various competitions in the fields of data, statistics, and AI/data science.

Experience

PT Transportasi Jakarta | Data Annotator Intern

Apr - Jun 2026

- Processed and validated over 1,500 image datasets/day to support AI-based passenger density detection.
- Developed Python automation to extract, preprocess, and organize annotation data for downstream analysis.
- Performed data quality assurance to ensure reliable, accurate, and consistent datasets before AI model training.
- Applied MobileNetV2 to automate representative frame selection and improve dataset quality.
- Collaborated with the AI development team to support efficient data preparation and operational analysis

PKM Lecturer Information Systems - Presenter & Mentor

Oct 2025

- Facilitate participants in the data analysis process using Microsoft Excel
- Guide participants in cleaning, transforming, and validating structured datasets
- Assist participants in data interpretation and developing insights from real-life case studies
- Direct the creation of data visualizations to support decision-making
- Document the analysis workflow in a systematic and structured manner

Orionids Inkubator Bisnis, ESQ Business School | Data Analyst

Des 2023 - Sep 2024

- Collected, cleaned, and validated structured datasets using Microsoft Excel and Google Sheets.
- Performed exploratory data analysis to identify trends and support data-driven decision making.
- Prepared reports and dashboards to support data-driven decision making.
- Assisted in improving data processing workflows through standardized documentation and data organization.
- Collaborated with team members to ensure data accuracy, consistency, and reporting quality.

Competition Experience

Astra Digital (Astronauts) Innovation Challenge

Jun 2026

Team Participant | Idea Track

- Conducted operational analysis to identify fleet utilization and resource efficiency challenges in a mining case study.
- Contributed to designing the OEFT framework integrating People, Process, and Technology.
- Designed the implementation roadmap for phased operational improvement initiatives.
- Proposed the concept and workflow of a Smart Decision Assistant to support operational monitoring and decision making.
- Collaborated with team members to develop solution strategies and prepare the final pitch deck.

Data Science Competition – ARA 7.0 Institut Teknologi Sepuluh November

Feb 2026

Team Leader | Kaggle Competition

- Led a team in developing an image segmentation model using U-Net.
- Performed image preprocessing and model evaluation under varying conditions.
- Improved model performance using annotated image datasets and ground truth masks.
- Developed an AI-based solution for automated pothole detection from road surface images.

Data Science Competition – Gelar Rasa UPN Veteran Jawa Timur

Oct 2025

Team Leader | Python Competition

- Led an end-to-end data analytics project in the FMCG domain using Python.
- Performed forecasting, trend analysis, and product performance evaluation.
- Developed data-driven recommendations to support business decision making.
- Achieved Top 7 among participating teams.

Hackathon – Study to Challenge, BINUS University

Sep - Oct 2025

Founder & Team Leader – Agricultural Marketplace Startup

- Founded and led the development of an agricultural marketplace startup concept.
- Defined the product vision, business model, and key marketplace features.
- Coordinated technical and data-related tasks across the team.
- Designed user-centered marketplace features based on research findings.
- Led the team to achieve Finalist status.

Organizations

NOVO Club By PARAGON Entrepreneurship Program – Batch 4

Mar 2026 - Present

Participant

- Participated in entrepreneurship learning sessions and collaborative activities.
- Explored business fundamentals, innovation, and entrepreneurial thinking.
- Collaborated with peers in discussions and social impact initiatives.
- Strengthened communication, teamwork, and problem-solving skills.

Student Executive Board (BEM) - Ary Ginanjar University

Mar 2025 - Jan 2026

Secretary of the Business Department

- Manage administrative documents, meeting minutes, and official correspondence
- Coordinate schedules and support department activities and programs
- Assist in planning and organizing business-related events and initiatives
- Support documentation and reporting for department programs

Asia Pacific Youth Empowerment Summit 2025/2026

Juli 2025 - Jan 2026

Health & Logistic Division

- Participate in organizing and supporting health-related programs and initiatives
- Ensure each committee receives health training
- Assist in data collection, documentation, and reporting for health-related sessions
- Support communication and coordination within the health division

Skills

Hard Skills:

Programming

- Python (Pandas, NumPy, Scikit-learn)
- SQL

Data Engineering

- Data Collection
- Data Cleaning & Validation
- Data Transformation
- ETL Concepts
- Workflow Automation (Python)
- Relational Database Concepts

Data Analytics

- Exploratory Data Analysis (EDA)
- Dashboard Development
- Data Visualization
- Descriptive & Predictive Analysis (Basic)

Soft Skills:

- Analytical Thinking
- Problem Solving
- Communication
- Team Collaboration
- Adaptability
- Continuous Learning
- Leadership

Tools

- Microsoft Excel
- Power BI
- Tableau
- Jupyter Notebook
- CVAT

Certification

- **Data Classification & Summarization** – IBM SkillsBuild & Hacktiv8
- **Data Science** – Bisa AI
- **Data Engineer** – Dibimbing
- **Data Science with Python** – DQLab
